

FIG. 1.

FIG. 6.

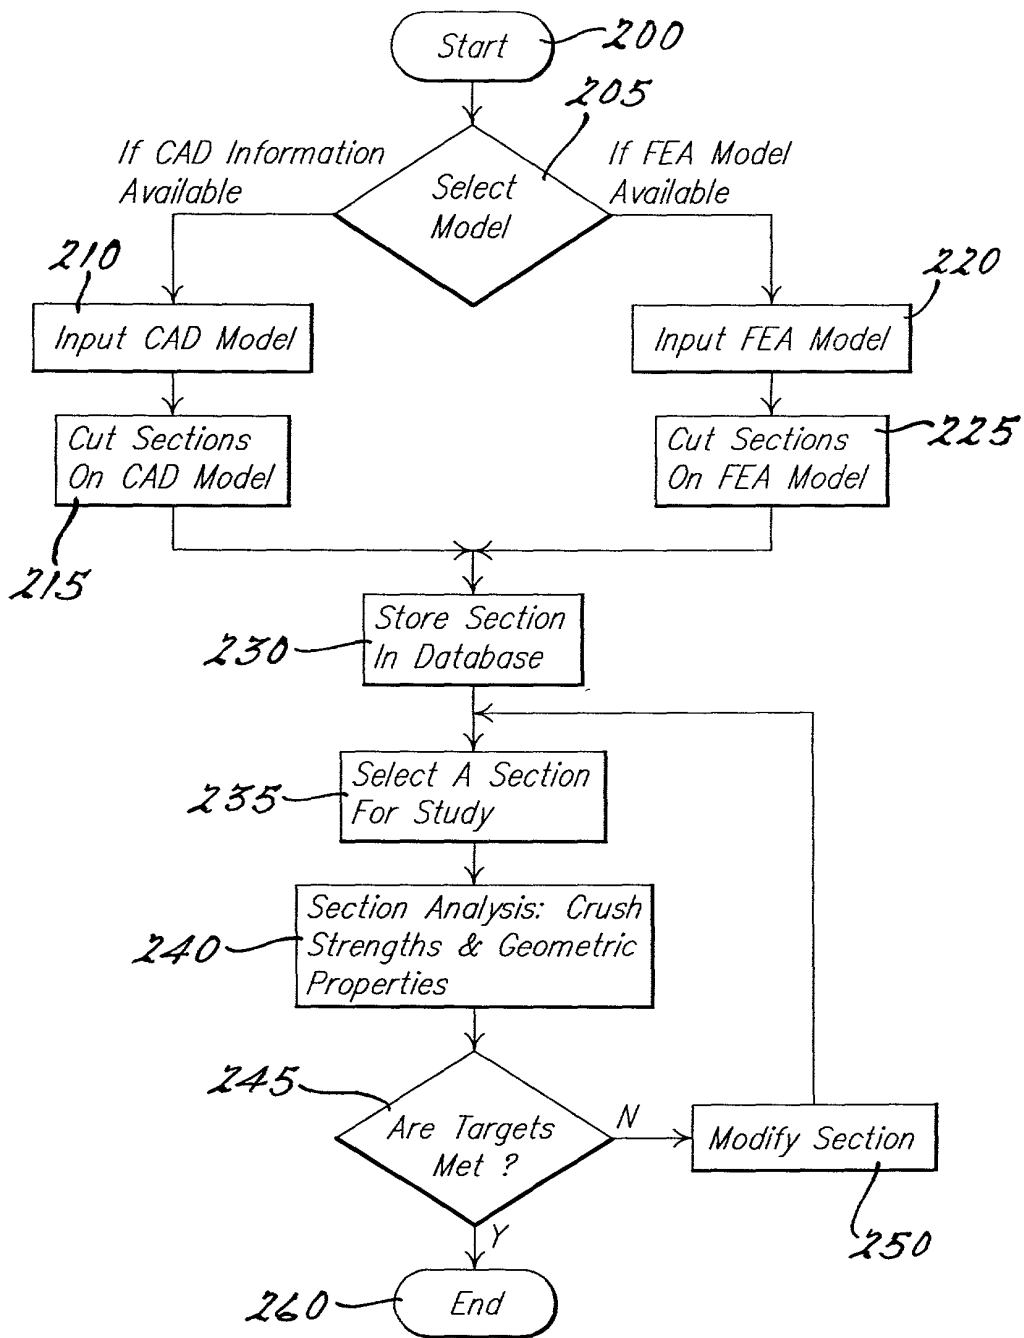

FIG. 3.

FIG. 1.

FIG. 8 is a graph showing the relationship between the input and output of the system. The graph shows a series of curves that represent the system's response to different input signals. The curves are labeled with the input signal values: 0.000, 43.000, and 96.000. The curves show that the system's output is a function of the input signal, and the output is a smooth curve that follows the general shape of the input signal.
